RE: Request FCC to lower significantly the RF Radiation Exposure limits.

On the next two pages is scan of my letter to President Obama outlining my difficulties from RF and microwave radiation through various devices.

President Barack Obama  
The White House  
1600 Pennsylvania Avenue NW  
Washington, DC 20500

Dear President Obama,

A Pacific Gas and Electric WIRELESS SMART METER was installed on my house without my permission and without my knowledge. Over the next six weeks I became increasingly sicker and sicker with the following symptoms: migraines, pressure and ringing in my ears, nausea, insomnia, neuropathy, rapid heartbeat, poor concentration and memory, anxiety and depression. My life came to a standstill. With research I discovered that the NON-IONIZING RADIATION PULSES EMITTED FROM MY SMART METER WERE THE CAUSE OF MY DEBILITATING SYMPTOMS. I also learned that my wireless meter was a mandatory component of the SMART Grid. I continue to be sick and so electromagnetically sensitive that now I have to have most of my electricity turned off. It's impossible for me to walk in neighborhood streets or many public places due to wireless SMART Meters, and as the world is increasingly wrapped in a dangerous web of electromagnetic smog.

I am not alone. Many health professionals believe that 3-8% of the population is electromagnetically sensitive. In 1998 the California Department of Human Services did a comprehensive survey and found that 120,000 Californians could not work due to Electromagnetic Hypersensitivity (EHS). With a SMART Meter or a neighbor's SMART Meter, where are we going to live, let alone work? We are SMART Meter refugees. We live in half our houses. We sleep in tents in our backyard. We live in our cars. We drive 50 miles to sleep at a relative's house. WE LIVE IN EXILE. This is all in the service of the SMART Grid. History and philosophers all remind us that the end does not justify the means. But somehow the questionable environmental merits of the SMART Grid justify making healthy people sick and

disregarding the democratic process. Here in California, 42 municipalities, cities and towns have passed ordinances banning the deployment of SMART Meters, but still the CPUC mandates their roll-out.

You wisely stated during your campaign that "WE MUST LISTEN TO WHAT SCIENTISTS ARE SAYING, EVEN IF AND ESPECIALLY IF IT IS AN INCONVENIENT TRUTH." The World Health Organization (WHO) just named non-ionizing radiation as a 2B carcinogen, in the same category as dioxins, lead and DDT. Your own Cancer Panel had already named it as a possible carcinogen. It is time for you to listen to all of us with EHS. We are not a fringe group, we are the canary in the coal mine. But what does that really mean? For the coal miners it was the difference between life and death. You should welcome us. We sound the bell. We are the harbingers, warning of a dark future to come so that you can stop this technological trajectory, this SMART Meter travesty.

I voted for you and I campaigned for you. I continue to marvel at the person you are. WE NEED YOUR HELP! We are in a time of energy transition, a time of starts and stops. According to cutting-edge scientists speaking at the Commonwealth Club in San Francisco, human-induced electromagnetic fields pose a greater threat to the environment than global warming. RF radiation will kill this world faster than carbon dioxide could ever dream of doing.

We need a MORATORIUM on wireless SMART Meters now until their health effects are better understood. FCC regulations are outdated and flawed. I would like to make a presentation to you, in person or over the phone, about the negative health effects of SMART Meters.

I appreciate so much that you read our letters and specifically chose to read mine. Thank you so much!

Sincerely yours,
